

THE ENERGY INDUSTRY IS CHANGING

Let Harper Pearson bring timely perspectives that deliver true competitive advantage across the energy value chain.

Whether an operator, service company, OEM or other specialist, accounting within the oil and gas industry is both complex and ever-changing. Harper Pearson's extensive energy experience and comprehensive capabilities can help your team better understand the rules, comply with reporting standards, manage risk, make the most of resources and never miss a chance to get ahead.

WELL ESTABLISHED IN THE **ENERGY INDUSTRY**

From optimizing strategies for depletion and depreciation of upstream assets to helping improve product valuation accuracy downstream, Harper Pearson has been a trusted name in the energy sector for decades.

| NAVIGATE **TAX LAWS**

Harper Pearson can help make smart choices that keep you in compliance while maximizing value. We assist foreign businesses looking to set up U.S. entities, prepare key U.S. international forms, IRS and state tax representation, multistate planning and more.

| STRATEGIC **CONSULTING**

Oftentimes it takes perspective to make the most of a situation. Harper Pearson can bring fresh insights to a variety of consulting engagements. From big-picture questions of corporate structure to tactical evaluations of accounting systems, we make every decision count.

| PERFORM **AUDITS**

Our team can help streamline and safeguard the auditing process. This includes everything from review and compilation of financial statements in accordance with U.S. GAAP or international standards to due diligence and financial analysis of reorganizations.

| OUTSOURCED **ACCOUNTING**

Outsourcing your company's accounting function can make a lot of sense. At Harper Pearson, we provide a total outsourced solution, deploying oil and gas accounting experts familiar with not only their discipline but also your particular industry.
